

**Subject: Pelviperineology June 2010 issue- Focus on the Integral Theory**

Dear Colleagues,

We invite you to read the June issue of Pelviperineology which has two foci, a Simplified Integral Theory, and some new directions deriving from it, a 3 year RCT between the TFS minisling and TOT, new insights on the role of lax ligaments in hemorrhoid formation and vulvodynia, pelvic pain, and Interstitial Cystitis causation.

**Invitation** Pelviperineology invites original contributions, reviews, and case reports. At Pelviperineology, the emphasis is on originality of thought, and clinical usefulness. No paper is rejected for technical reasons. Contributions from non-native English speakers are especially encouraged. A young and dynamic editorial staff assist with English language corrections.

Pelviperineology is available free online: [www.pelviperineology.org](http://www.pelviperineology.org)

On behalf of the Editorial Board of Pelviperineology,  
Giuseppe Dodi and Bruce Farnsworth
